# Shawn Eliezer

Full Stack Developer and Team Lead. In my role, I lead a development team and work on designing and implementing complex systems, particularly in the defense field. I enjoy constantly learning new things and improving my technical skills. In my free time, I like to work on personal development projects with new technologies.

## EXPERIENCE

**Jul 2024 Present**

**DEVELOPMENT TEAM LEAD**
**J6 & Cyber Defense Directorate, IDF. Israel**

Promoted to Team Lead, overseeing a team of full stack developers. Responsible for guiding project development, facilitating collaboration, and ensuring timely delivery of high-quality software solutions.

Project Management: Lead the design and implementation of complex systems, managing timelines, resources, and stakeholder communication.

Technical Expertise: Drive the development of innovative web technologies and products using Node.js, React.js, Next.js, and other modern technologies.

Team Development: Mentor and support team members, fostering professional growth and skill development within the team.

Cross-Functional Collaboration: Work closely with other departments, including product management and design, to align technical solutions with business goals.

**Jun 2022 Jul 2024**

**FULL STACK DEVELOPER**
**J6 & Cyber Defense Directorate, IDF. Israel**

IDF, Rehovot Currently working on a website to improve performance in the field, working with a variety of languages, such as : JavaScript, react.JS, CSS, Python, MongoDB, Node.js, SQL, Pandas, Socket.io, Paramiko, etc. Designed intuitive graphical user interfaces to improve user experience Developed software for desktop and mobile operating systems Developed clear specifications for project plans using customer requirements Planned website development, converting mockups into usable web presence with HTML, JavaScript, AJAX and JSON coding Oversaw technical issues and troubleshooting requests to resolve user problems Designed client-side and server-side architecture and implemented cloud- based back end solutions

**Aug 2016 Jun 2020**

**GRADUATE PROJECT**
**rehovot**

Building a website for the final project. During the construction of the site I created several browsers that take you to sources of information that I inserted after thorough investigation. The site dealt with the creation of space, whether it is in terms of the spaceships or whether it is the team that was involved in its development. In addition, there was a login and registration button that also sends you a code to your cell phone and email to register, and it was also possible to make changes, be it to change your email or to change your cell phone number. During the construction we used several programming languages: JavaScript, HTML, CSS, etc.

## EDUCATION

**BACHELOR'S DEGREE, COMPUTER SCIENCE**
**The Open University Of Israel. Israel**

**GRADUATED: JAVA DEVELOPER**
**Kiryat Education For Sciences. Israel**

**DIPLOMA : PHYSICAL EDUCATION AND SPORT SCIENCES**
**Wingate College of Physical Education and Sport.**

**DIPLOMA : ELECTRICAL ELECTRONICS ENGINEERING TECHNOLOGIES**
**Ort Rehovot.**
